Education

Vellore Institute of Technology, Bhopal

Sep 2023 – Present

B.Tech in Computer Science (AI & ML)

GPA: 7.89

AI/ML undergraduate specializing in **Natural Language Processing, Large Language Models (LLMs), and Agentic AI Systems**. Experienced in designing **multi-agent workflows, LLM pipelines**, and deploying scalable applications using FastAPI.

Coursework: Data Structures, Machine Learning, DBMS, Operating Systems

Experience

Machine Learning Intern — SmartBridge

May 2025 – Jun 2025

- Engineered and optimized **5+ machine learning models** (classification and regression), improving accuracy by **20%**.
- Performed feature engineering and preprocessing on **10k+ data samples**, enhancing model robustness and generalization.
- Applied hyperparameter tuning techniques (Grid Search), improving **F1-score by 12%**.
- Evaluated model performance using metrics such as precision, recall, and ROC-AUC.

Projects

IntentIQ — Agentic AI Chatbot

[Live](#) — [GitHub](#)

- Developed an **agentic AI chatbot** using **LangGraph and LangChain** with multi-step reasoning capabilities.
- Designed a **multi-agent architecture** enabling tool-calling and dynamic decision-making.
- Integrated external APIs for **real-time information retrieval** and contextual responses.
- Built and deployed an interactive interface using **Streamlit**, ensuring scalability and low latency.

MedVoice AI — AI Doctor Voicebot

[Live](#) — [GitHub](#)

- Built a **multimodal AI healthcare assistant** integrating **speech-to-text (STT)** and **text-to-speech (TTS)** pipelines.
- Enabled **real-time voice-based interaction** for medical queries using LLM-powered responses.
- Applied advanced **prompt engineering techniques** to improve response relevance and accuracy.
- Deployed the application on **HuggingFace Spaces** for accessibility and scalability.

World Atlas — Interactive Data Visualization Platform

[Live](#) — [GitHub](#)

- Developed an **interactive data visualization platform** using real-time API integration.
- Implemented advanced **search, filtering, and dynamic rendering** for improved user experience.
- Optimized frontend performance, reducing load time and improving responsiveness.

Skills

Languages: Python, C++, SQL

GenAI & AI: LLMs, LangChain, LangGraph, Prompt Engineering, Agentic AI

Machine Learning: Regression, Classification, Model Evaluation, Feature Engineering

Frameworks: FastAPI, Streamlit

Cloud & Deployment: AWS (EC2, S3), HuggingFace Spaces, Streamlit Cloud

Tools: Git, GitHub, Postman, Docker (Basics)

Certifications

SmartBridge ML — Google for Developers

NPTEL Cloud Computing — Elite

Extracurricular Activities

Vice President — Public Relations, Toastmasters International

Core Member — PR Team, Blockchain Club

- Recognized with a Letter of Appreciation for leadership and organizational contributions.
