EDUCATION

VIT Bhopal University

B.Tech in Computer Science Engineering (Artificial Intelligence & Machine Learning)

Expected May 2027

CGPA: **8.17/10**

PROFESSIONAL SUMMARY

Software Engineer and AI/ML Engineer with experience developing scalable AI applications using Python, FastAPI, REST APIs, Machine Learning, Deep Learning, Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), LangChain, LangGraph, NLP, and Computer Vision. Strong foundation in Data Structures, Algorithms, Object-Oriented Programming, backend development, cloud deployment, and software engineering principles.

TECHNICAL SKILLS

Languages: Python, C++, SQL

Core CS: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

AI/ML: Machine Learning, Deep Learning, Generative AI, LLMs, RAG, AI Agents, NLP, Computer Vision, LangChain, LangGraph, HuggingFace, FAISS, Prompt Engineering

Frameworks: FastAPI, REST APIs, React, Streamlit, Gradio

Databases: PostgreSQL, MySQL

Developer Tools: Git, GitHub, AWS, CI/CD, Agile, SDLC

EXPERIENCE

Bluestock Fintech | Software Development Engineer Intern

Mar 2026 – Apr 2026

- Developed scalable backend services using Python, FastAPI, and REST APIs, contributing to 10+ production features and software enhancements.
- Optimized backend logic, resolved production issues, and improved API performance through testing and code optimization.
- Collaborated with cross-functional teams using Git, CI/CD pipelines, Agile methodologies, and code reviews to ensure reliable software delivery.

SmartBridge | Machine Learning Intern

May 2025 – Jun 2025

- Built end-to-end machine learning pipelines using Python and Scikit-learn on datasets containing over 10,000 records.
- Improved prediction accuracy by 20% through feature engineering, preprocessing, and hyperparameter optimization.
- Automated model training and evaluation workflows, reducing experimentation time by 30%.

PROJECTS

Adaptive AI Agent Platform

[GitHub](#) | [Live Demo](#)

- Built a multi-agent AI platform using LangGraph, LangChain, FastAPI, and Gemini/OpenAI APIs supporting over 1,000 user interactions.
- Integrated conversational memory, intelligent routing, tool calling, and web search augmentation, improving contextual response quality by 30%.
- Designed scalable backend APIs and deployed Streamlit applications achieving sub-2-second response latency.

MediLens AI Knowledge Engine

[GitHub](#) | [Live Demo](#)

- Developed a Retrieval-Augmented Generation (RAG) system using FAISS, HuggingFace embeddings, semantic search, and vector databases.
- Integrated LLaMA 3.3 and Gemini Vision for multimodal document understanding across PDF and image-based medical records.
- Improved retrieval precision by 35% while reducing search latency by 25% through optimized vector indexing.

VoiceVision Healthcare AI

[Live Demo](#)

- Developed a multimodal healthcare assistant integrating speech recognition, computer vision, OCR, and LLM-powered reasoning.
- Built voice, image, and text processing pipelines supporting over 500 multimodal interactions.
- Designed a modular AI architecture enabling scalable deployment while reducing feature integration effort by 40%.

CERTIFICATIONS

ET-AI Hackathon 2026 Semi-Finalist • The Economic Times Digital

Machine Learning Specialization • DeepLearning.AI

NPTEL: Introduction to Internet of Things

LEADERSHIP & EXTRACURRICULARS

Vice President – Public Relations, Toastmasters International

- Led branding, event marketing, sponsorship outreach, and communications for a 20+ member organization while coordinating technical and leadership events.
